

The Bose logo is displayed in a white, italicized, sans-serif font. It features a horizontal line extending from the left of the 'B' and a registered trademark symbol (®) at the end of the 'E'. The background of the slide consists of dark blue, flowing, wave-like patterns that create a sense of motion and depth.

Bose Connected Music Cloud Infrastructure, Team, Strategy

Josh West <josh_west@bose.com>
Cloud Architect
Home Entertainment Division

Bose Connected Music Project

- Home Entertainment Division
- Research and Advanced Development
- Product Owner & Manager: Keith Martin
- Algorithms and Cloud Experience

How: Cloud

How : Cloud : Infrastructure

- Introduction to Cloud Computing
- Infrastructure as a Service
- Amazon Web Services
 - Pioneered IaaS in 2006 (Xen)
- Multiple cloud providers available today:
 - Microsoft Azure
 - Google Compute Engine
 - Rackspace Cloud, HP Helion, etc....

Jeff Bezos AWS Memo

- All teams will henceforth expose their data and functionality through service interfaces.
- Teams must communicate with each other through these interfaces.
- There will be no other form of inter-process communication allowed: no direct linking, no direct reads of another team's data store, no shared-memory model, no back-doors whatsoever. The only communication allowed is via service interface calls over the network.
- It doesn't matter what technology they use.
- All service interfaces, without exception, must be designed from the ground up to be externalizable. That is to say, the team must plan and design to be able to expose the interface to developers in the outside world. No exceptions.
- ***Anyone who doesn't do this will be fired. Thank you; have a nice day!***

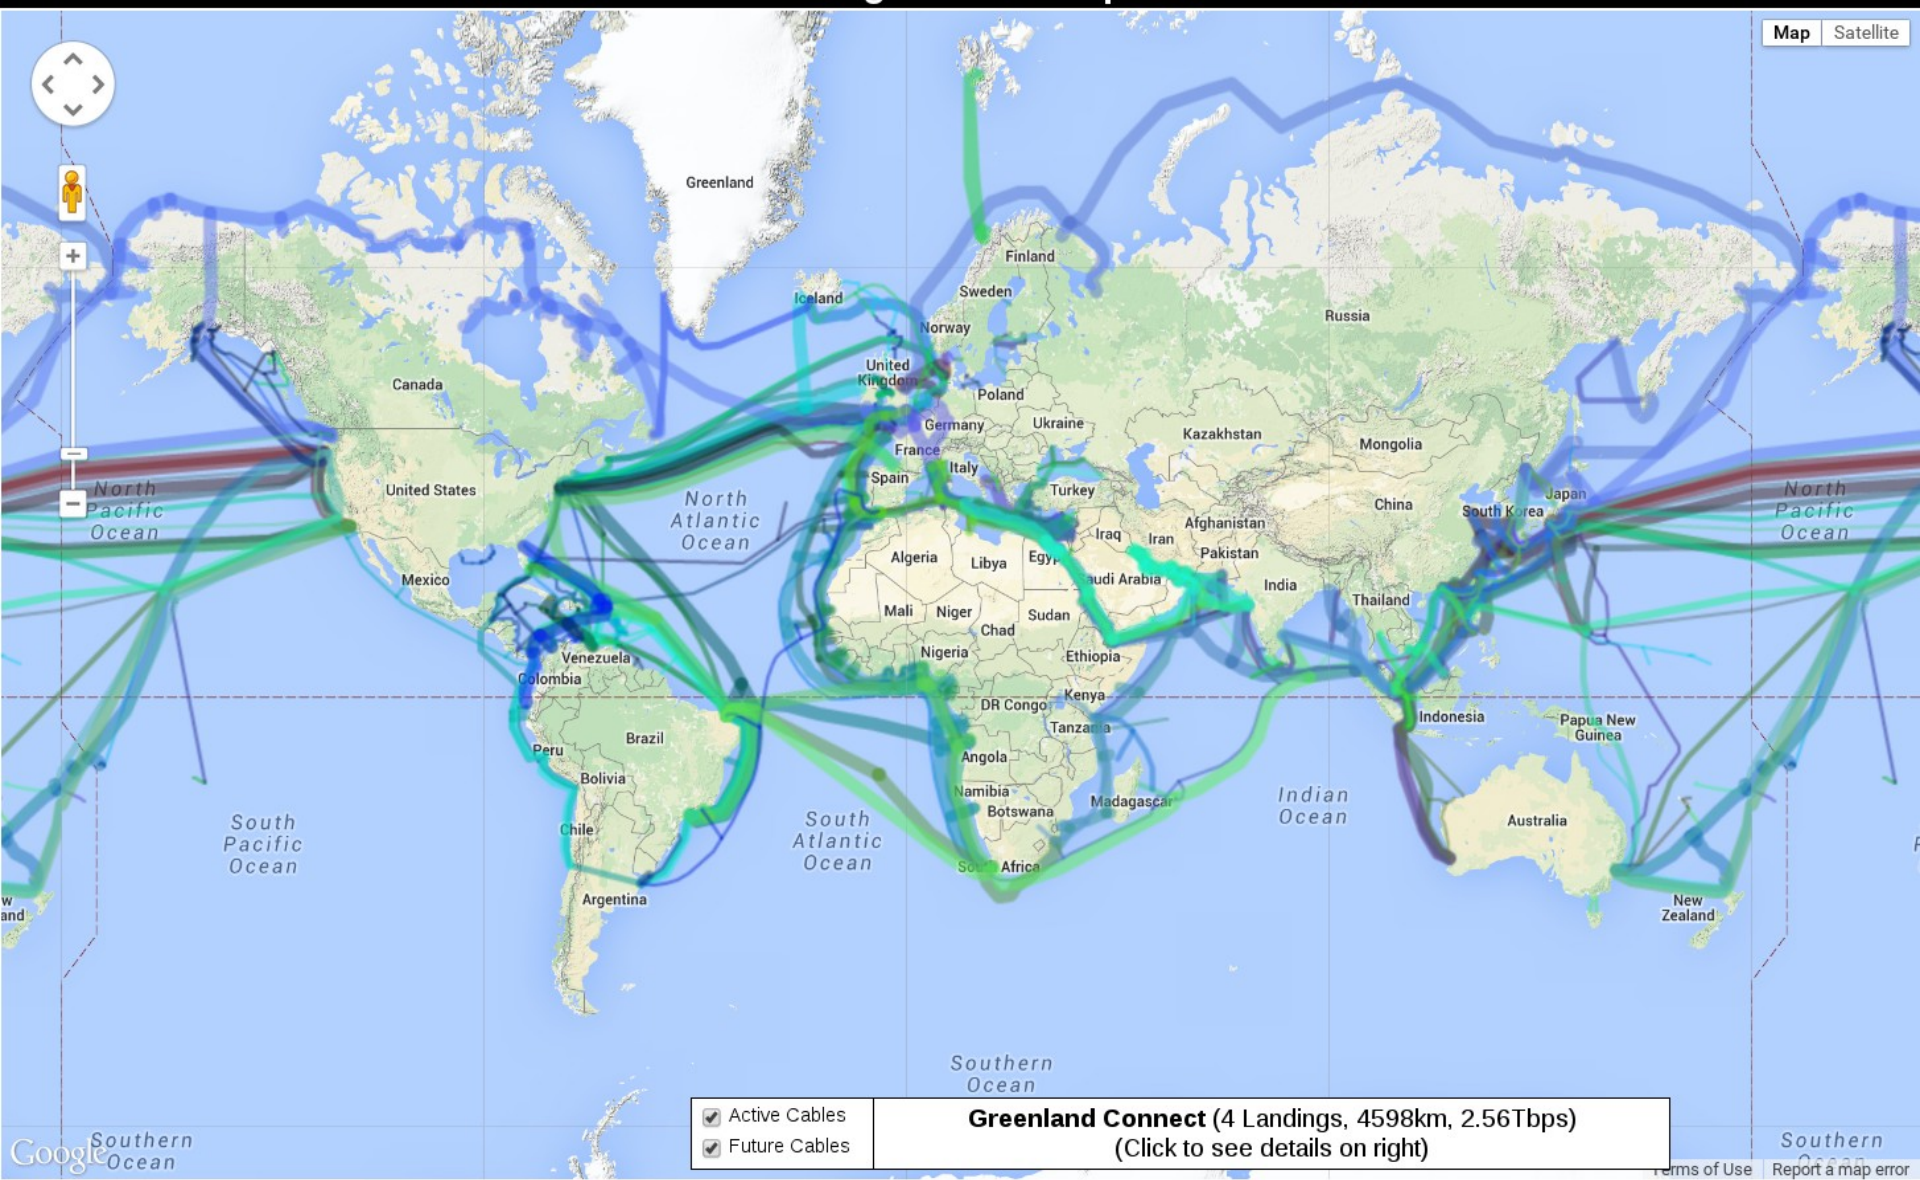

Amazon Web Services Concepts

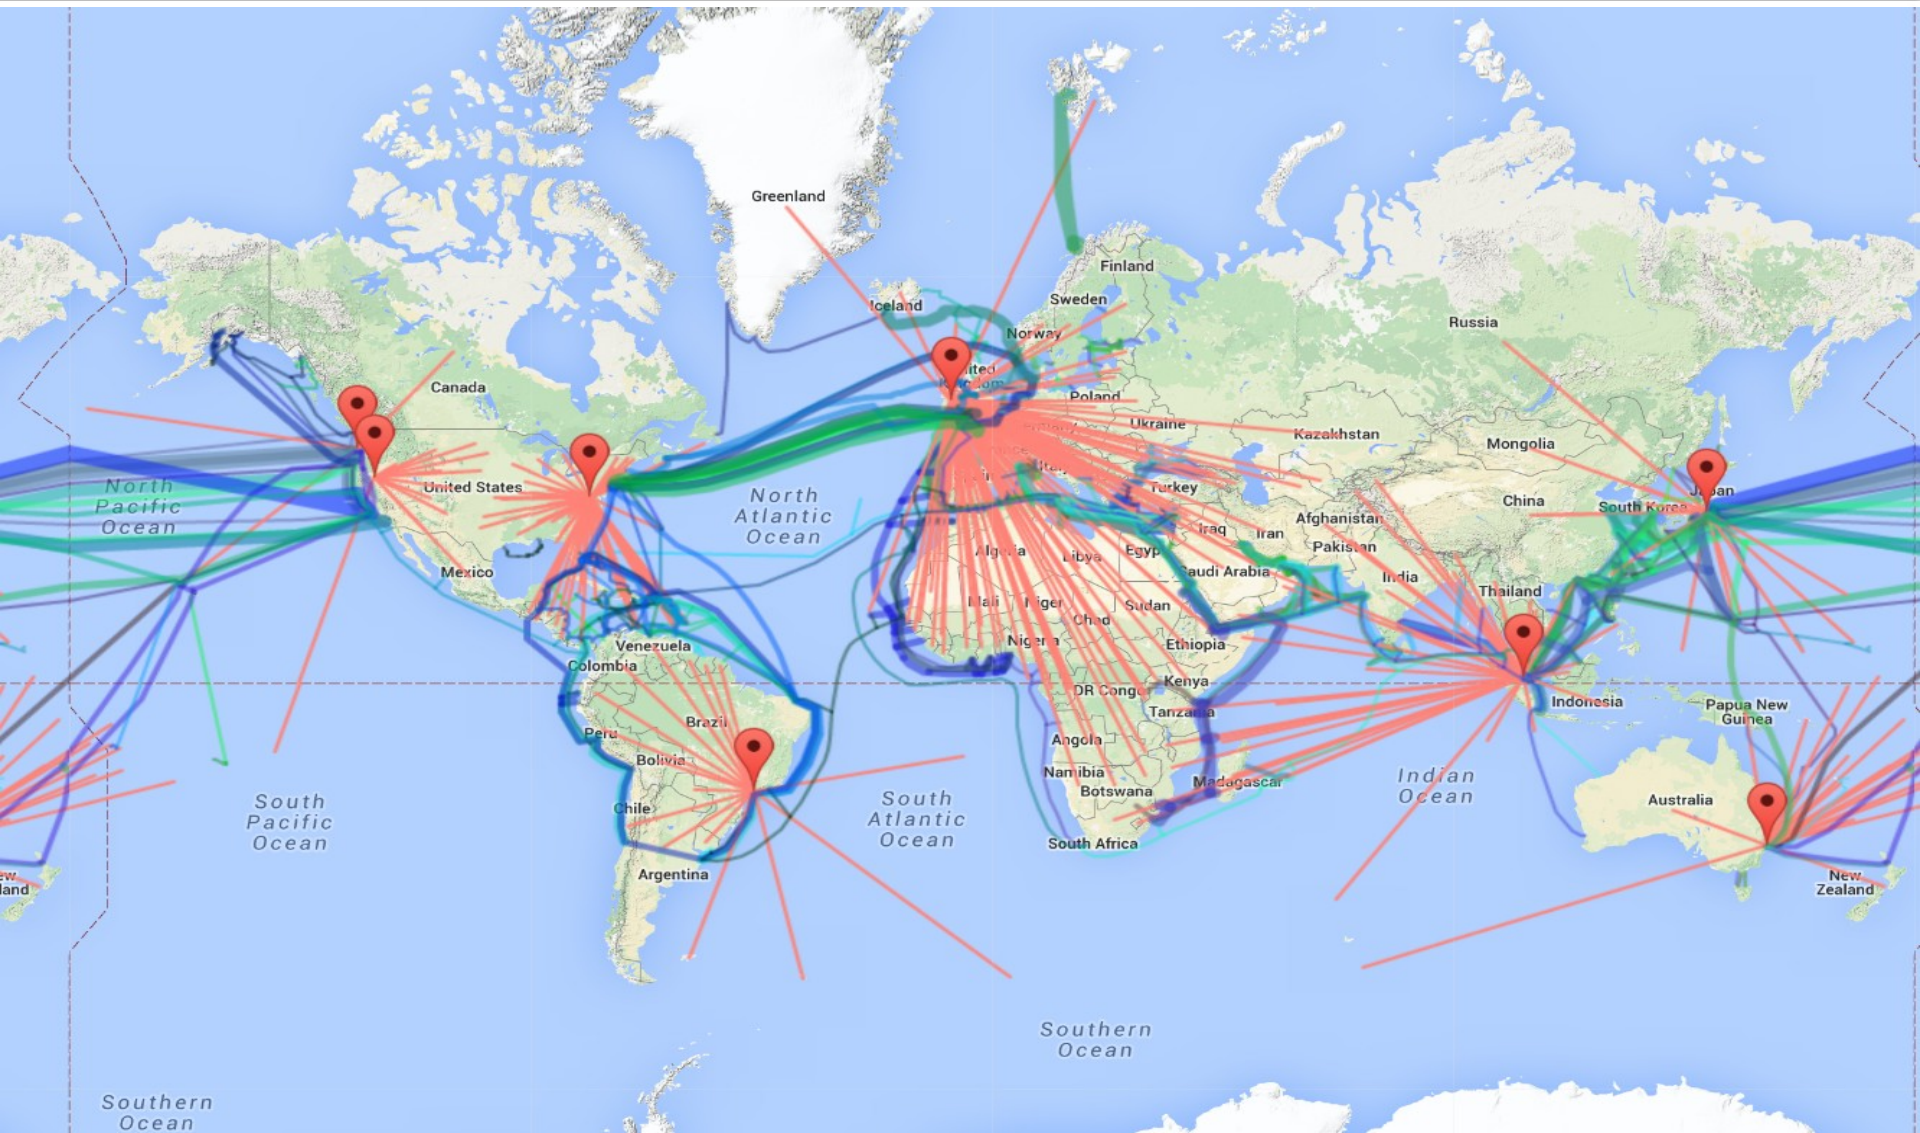

- **Instance:** virtual server
- **Region:** collection of datacenters proximally located
network is one fabric (connected)
- **Availability Zone:** datacenter with a region
- **Billing:** charged based on usage
 - Cpu time
 - Network traffic
 - Storage
 - Everything and anything...

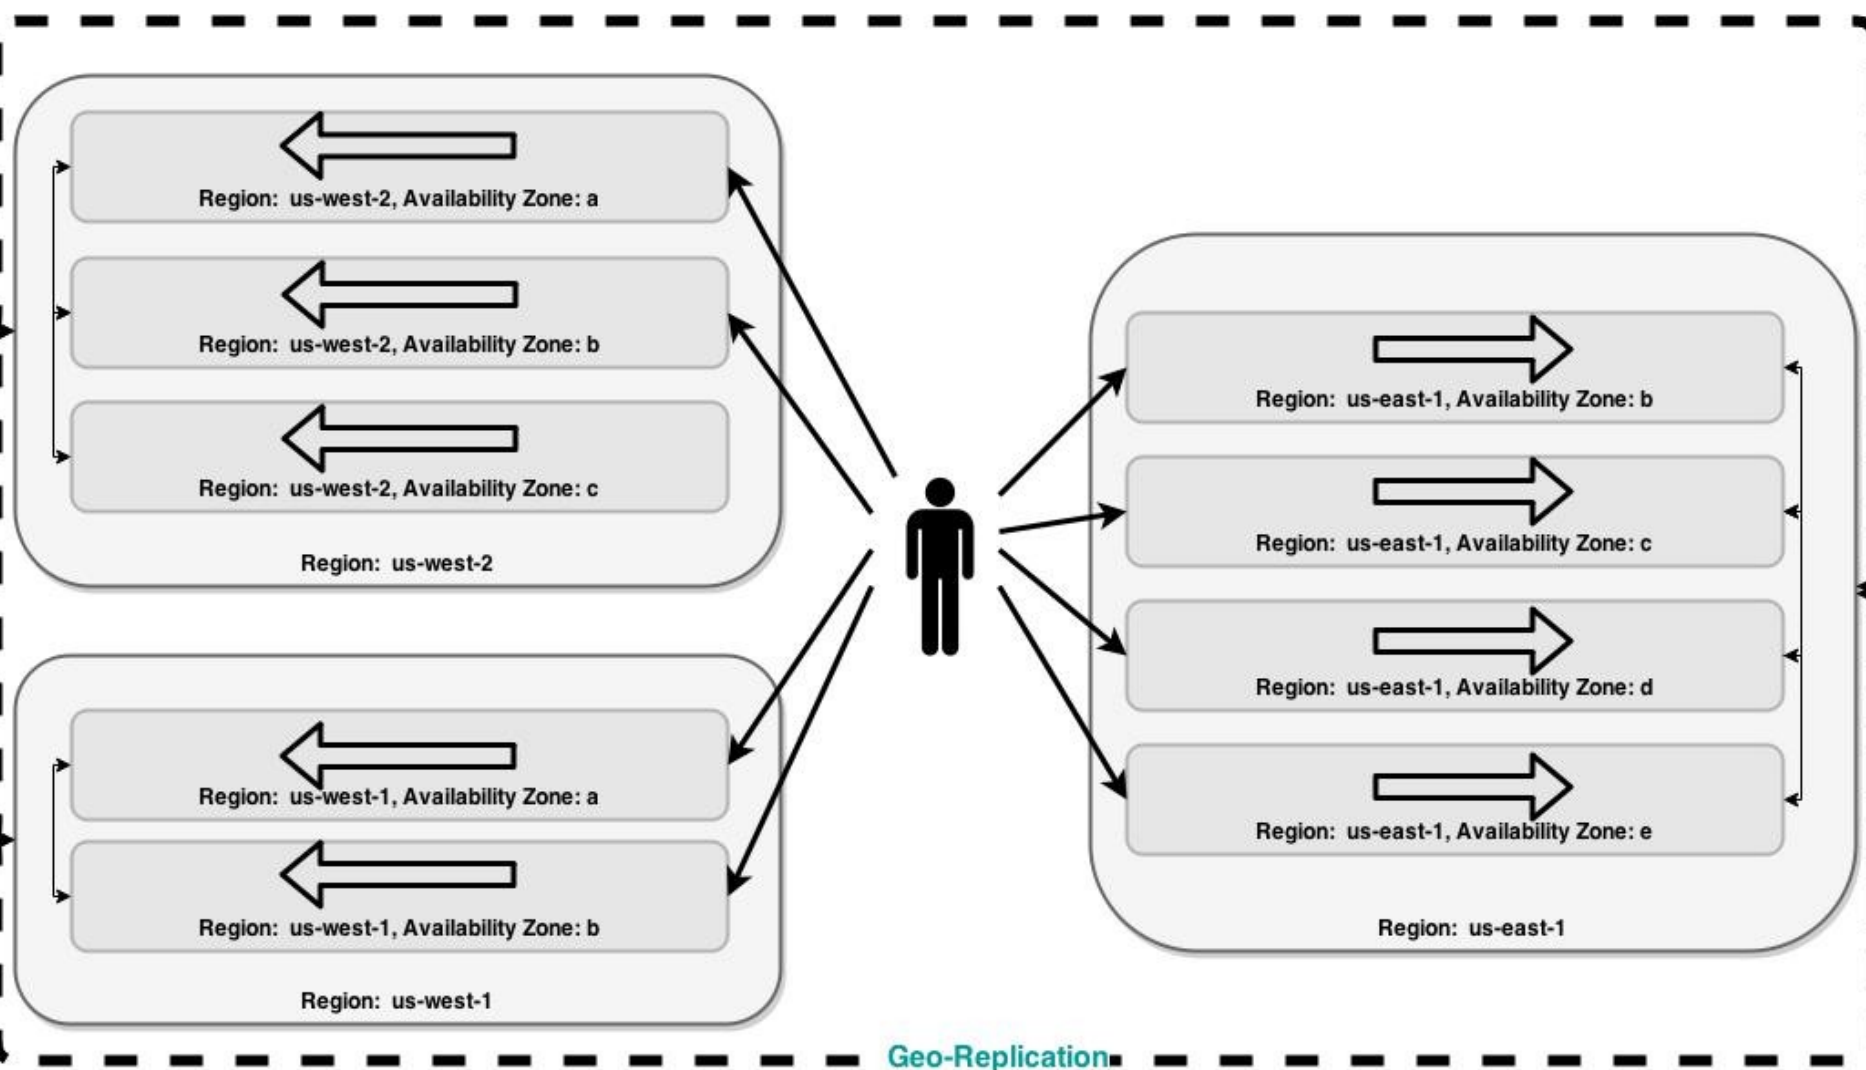

AWS Regions and Availability Zones

CAP Theorem

Bose Connected Music

How: Cloud

How : Cloud : Team

- People!
- **We are hiring!**
- Looking for Cassandra, NoSQL, big data, cloud engineering, high availability rockstars!
- Looking for machine learning experts!

How: Cloud

Cloud Strategy

- Enable us to lower risk, tolerate failures
- Enable us to be cost/budget sensitive
- Enable us to be flexible and portable
- Let us build for global scale (and domination)
- Strike balance between Not/Invented Here Syndrome
- Open to the future; open to constant change

(Not) Invented Here Syndrome

- With invent of {I,P,M,S}aaS, now seeing IHS
 - Vendor and solution lock-in
 - Great for start-ups (few people, no time)
 - We are not a start-up (well, sorta).
 - We have the expertise to “Do It Right”™

Strategy: Horizontal Scaling

Strategy: Infrastructure as Code

TERRAFORM

CHEF™

Fabric

*Cloud Provisioning and
Configuration*

*Server and Service
Configuration*

*Data Loads and
Sysadmin Tasks*

Strategy: Expect Failure!

Strategy: Security

Strategy: Cross Cloud Provider (Hybrid)

Google Compute Engine
